

**EXSYMOL**  
MONACO

# SILIPEARL

## Skin radiance & Restructuring

INCI Denomination: Silanetriol (and) hydrolyzed pearl (and) water

Tone radiance

Smoothness

Moisturization

Anti-aging

Silanol  
+  
Pearl

**EXSYMOL** used pearl powder functions (protein, amino acids, polysaccharides), capable to react with silanols and become SILIPEARL, the pearl silanol. Silanol technology permitted SILIPEARL to combine pearl powder properties with the excellent bio-availability of the silanol.

Inspiration from Chinese  
Beauty Ritual

During the Ching dynasty, the impress used pearl powder as a beauty product to brighten her skin tone

## Radiance and Smoothness

Improvement of skin aspect  
Smoothing effect  
(+10%)

## Moisturization

**Pearl powder** contains 16 essential amino acids, proteins and polysaccharides essentials to maintain a high moisturization rate in the epidermis.

**Double effect:** Silanols, thanks to their hydroxyl group are able to bind up water molecules and create water spheres

## Anti-aging

### **Biominalisation**

The pearl powder is composed of aragonite crystal, oligo-elements and minerals (Calcium) essential to cell metabolism. Silanols, thanks to silicium (silicon), are also involved in cell metabolism.

### **Cell regeneration**

Silanols stimulate fibroblast renewal and increase collagen production.

## Composition

Silanetriol	0.3%
with silicium	0.09%
Hydrolyzed pearl (with aminoacids)	1%
Water	sq 100

**Recommended concentration of use**  
1 to 10%
